CROSS-PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE NINTH CIRCUIT

Ethicon, Inc. ("Ethicon") requests that a writ of certiorari issue to review the judgment and opinion of the United States Court of Appeals for the Ninth Circuit entered in this proceeding on May 3, 1979, and revised on July 27, 1979.

Opinions Below

The majority and concurring opinions of the Court of Appeals, as modified on Ethicon's petition for rehearing, are reported as *Handgards, Inc.* v. *Ethicon, Inc.*, 601 F.2d 986 (9th Cir. 1979). The pertinent opinions of the District Court for the Northern District of California are reported as *Handgards, Inc.* v. *Johnson & Johnson*, 1976-2 Trade Cases ¶ 61,138 (N.D. Cal. 1976) (denying Ethicon's post-verdict motions) and as *Handgards, Inc.* v.

Johnson & Johnson, 413 F. Supp. 921 (N.D. Cal. 1975) (granting in part and denying in part Ethicon's motion for summary judgment).

Jurisdiction

The judgment of the Court of Appeals for the Ninth Circuit was originally entered on May 3, 1979. The Court denied a timely petition for rehearing on July 27, 1979, and issued opinions revising both the original majority and concurring opinions. This petition for a writ of certiorari was filed within 90 days of that date. This Court's jurisdiction is invoked under 28 U.S.C. § 1254(1).

Questions Presented

1. May Handgards' antitrust action for treble damages under § 2 of the Sherman Act be predicated solely upon Ethicon's prior unsuccessful suit to enforce a validly obtained patent?

2. Is Ethicon's prior patent enforcement suit entitled to First Amendment immunity from antitrust consequences?

3. Is liability for monopolization precluded by the jury verdict that Ethicon possessed a valid patent protecting the product claimed to constitute the relevant market for § 2 purposes?

Constitutional Provisions Involved

United States Constitution, Article I, Section 8, clause 8:

> "To promote the Progress of Science and the useful Arts, [Congress shall have Power to secure] for limited times to Authors and Inventors the *exclusive** right to their respective writings and discoveries. . . ."

---

* In this cross-petition, emphasis has been added except where otherwise noted.

United States Constitution, Amendment I:

> "Congress shall make no law . . . abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances."

Statutory Provisions Involved

Sherman Act, § 2, 15 U.S.C. § 2:

> "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor. . . ."

35 U.S.C. § 154:

> "Every patent shall contain a short title of the invention and a grant to the patentee, his heirs or assigns, for the term of seventeen years, subject to the payment of issue fees as provided for in this title, of the right to exclude others from making, using, or selling the invention throughout the United States. . . ."

Statement of the Case

This a private antitrust action in which Handgards, Inc. ("Handgards") won a verdict of $2,073,000, before trebling, based upon Ethicon's alleged monopolization, in violation of Section 2 of the Sherman Act, 15 U.S.C. § 2, of a market defined as heat-sealed plastic gloves sold to manufacturers of home hair coloring kits. Handgards based its antitrust claim upon Ethicon's prior unsuccessful

attempt to enforce a patent Ethicon held on a process for manufacturing such gloves. The Court of Appeals for the Ninth Circuit reversed the judgment on grounds not relevant to this cross-petition. The Court affirmed the holding of the district court that a single attempt to enforce a non-fraudulently procured patent may constitute an antitrust violation.

A. The Prior Patent Infringement Action

In the early 1960s, Ethicon acquired a patent covering a process and apparatus for manufacturing disposable heat-sealed plastic gloves (the Gerard patent). It also acquired a product patent covering the glove made by the patented apparatus (the Orsini patent). In 1962 Ethicon filed suit against Handgards' corporate predecessors, alleging infringement of the Gerard process patent. In 1964, when the Orsini patent issued, Ethicon added a claim that the Orsini product patent was being infringed.

The patent suit was tried without a jury in 1968. For tactical reasons, Ethicon's trial counsel limited the trial to the validity and infringement of the Gerard process patent. The trial judge entered judgment for Handgards, concluding that the Gerard process patent was invalid. On appeal, the Ninth Circuit affirmed, 432 F.2d 438 (1970), holding that the trial court's findings were not clearly erroneous, but noting that the infringement action was one which "could have been decided either way."

B. The Present Action

Handgards filed this antitrust action in 1968, claiming that the Orsini product patent, whose validity had not been adjudicated in the prior patent suit, had been fraudulently procured. This claim was based upon the

decision in *Walker Process Equipment, Inc.* v. *Food Machinery & Chemical Corp.*, 382 U.S. 172 (1965), which held that "the enforcement of a patent procured by fraud on the Patent Office may be violative of § 2 of the Sherman Act provided the other elements necessary to a § 2 case are present." 382 U.S. at 174.

In 1975, Handgards conceded that it could not prove fraud in the procurement of the Orsini patent. Accordingly, it abandoned its *Walker Process* claim and the district court granted Ethicon's motion for summary judgment on that issue. *See Handgards, Inc.* v. *Johnson & Johnson*, 413 F. Supp. 921, 923 (N.D. Cal. 1975). The district court, however, sustained the legal sufficiency of the complaint on other theories, including a theory that the "bringing of a *series* of ill-founded patent infringement actions, in bad faith, can constitute an antitrust violation in and of itself *if* such suits are initiated or pursued with an intent to monopolize" and if the other elements of a Section 2 violation are proven. *See* 413 F. Supp. at 924-25.

At trial Handgards obtained a jury verdict on the theory that Ethicon had maintained not a series of lawsuits, but a single prior patent infringement action in bad faith—that is, with knowledge that the Gerard process patent was invalid. The trial court defined the term "bad faith" as applied to the prosecution of the Gerard patent as knowing that the particular patent was invalid because (i) Ethicon allegedly knew of relevant prior art existing more than a year before the filing of the Gerard patent application, or (ii) Ethicon allegedly knew that the invention had been on sale more than a year prior to the filing of the Gerard patent application.*

---

* The jury was allowed to speculate on this charge of supposed bad faith even though it was undisputed that the Gerard process was never even offered for sale. It was allowed to do so because the trial court erroneously confused a sale of a product

[Footnote continued on following page]

Handgards relied chiefly upon the trial court's ruling that Ethicon was collaterally estopped from attacking not only the findings in the prior patent suit, but also the testimony of Lyle Shabram, Handgards' principal witness in the patent suit, who had sworn that he had made an invalidating prior public use of the invention patented by Gerard. Thus, the trial court instructed the jury that "as a matter of law . . . you're required to accept the fact that Shabram was telling the truth" when he testified to an invalidating public use.

In defense, Ethicon (1) produced its patent attorneys who testified to their advice to Ethicon respecting the bona fides of the patent suit; (2) relied upon the trial judge's specific refusal in the patent suit to find that Ethicon had acted in bad faith in resisting the defenses in that suit and upon the Ninth Circuit's statement that the patent suit could have been decided either way; (3) introduced admissions by Handgards' patent counsel that its defenses in the patent suit were either subject to doubt or lacking in merit; and (4) proved that a supposed inaccurate answer to an interrogatory was a good faith statement of Ethicon's position as to priority of invention, a possible affirmative defense ultimately abandoned by Handgards.

The trial court submitted the case to the jury on the "bad faith prosecution" theory,* instructing the jury

---

made from the patented process with a sale of the process itself. The inability of the trial court to grasp this rather sophisticated distinction of patent law is perhaps the most eloquent illustration of the dangers inherent in permitting a lay jury to second-guess substantive and tactical patent law decisions.

* The trial court also charged the jury on the "overall scheme" theory of *Kobe, Inc.* v. *Dempsey Pump Co.*, 198 F.2d 416 (10th Cir.), *cert. denied*, 344 U.S. 837 (1952). Under this theory, the trial court charged, the maintenance of the prior patent suit could amount to an antitrust violation if the suit were "brought or maintained . . . to further a plan or scheme . . . to monopolize."

[Footnote continued on following page]

that "[the prosecution] of *one* or more ill-founded patent infringement actions in bad faith . . . constitutes an antitrust violation in and of itself if such suits are initiated or pursued with an intent to monopolize. . . .' *See* 601 F.2d at 994 n.15. "Bad faith" was defined as "knowing either at the time the lawsuit is filed or during its pendency that the particular patent sued upon is invalid." *Id.*

Based on this subjective definition of bad faith, the jury returned a general verdict in favor of Handgards in the amount of $2,073,000 before trebling. In response to certain special interrogatories, the jury found that Ethicon possessed a valid product patent covering the relevant market (Orsini), but that it had prosecuted the prior infringement action in bad faith; that is, with knowledge that the Gerard process patent was invalid. Ethicon's post-verdict motions were denied, the trial court retreating from its 1975 opinion that a "series" of bad faith lawsuits could constitute an antitrust violation, *see* 413 F. Supp. at 924-25, and now holding that a single bad faith infringement suit "alone is sufficient to support the verdict." *See* 1976-2 Trade Cases ¶ 61,138 at 70,143 (N.D. Cal. 1976).

On appeal, the Ninth Circuit, with Kennedy, C.J., concurring in the result, reversed the judgment on grounds not relevant to this cross-petition. The Court of Appeals affirmed the district court on its holding that a *single* attempt to enforce a non-fraudulently procured patent may constitute an antitrust violation. The Court, per Sneed, C.J., stated:

See 601 F.2d at 994 n.15. The Court of Appeals held, however, that "only the bad faith theory of recovery exists in this case," *id.* at 995 n.15, and that the verdict could not be supported on this alternative "overall scheme" theory. Both sides agree that the verdict cannot be supported on the "overall scheme" theory, and this issue is not raised in the petition or the cross-petition before this Court.

> "Patentees must be permitted to test the validity of their patents in court through actions against alleged infringers. Their status as alleged possessors of a legal monopoly does not cause them to be pariahs before the law. *Eastern Railroad Presidents Conference* v. *Noerr Motor Freight, Inc.*, 365 U.S. 127 (1961) and *United Mine Workers* v. *Pennington*, 381 U.S. 657 (1965) require no less. On the other hand, infringement actions initiated and conducted in bad faith contribute nothing to the furtherance of the policies of either the patent law or the antitrust law. *The district court was correct in holding, in effect, that such actions may constitute an attempt to monopolize violative of Section 2 of the antitrust law.*" 601 F.2d at 993 (footnotes omitted).

On the question whether Ethicon's prior action to enforce its non-fraudulently procured patent was immune from antitrust consequences under the First Amendment to the United States Constitution, the Court of Appeals majority noted simply:

> "Our opinion treats 'infringement actions initiated and conducted in bad faith,' established in the manner we require, as violative of Section 2 of the antitrust law. When so established, it would be strange to then hold that nonetheless a [First Amendment] immunity might exist. In any event, this is an issue that the present record does not require us to address." 601 F.2d at 995 n.16.

Concurring in the result, Judge Kennedy noted that the majority's decision, sustaining the legal sufficiency of the antitrust claim based on the prior patent suit, departed in two significant respects from this Court's governing decisions. Judge Kennedy stated:

> "In *Franchise Realty* [*Interstate Corp.* v. *San Francisco Local Joint Executive Board*, 542 F.2d 1076 (9th Cir. 1976), *cert. denied*, 430 U.S. 940 (1977)] we held that an antitrust plaintiff must plead that the litigation or petitions which allegedly caused competitive injury were sham proceedings, the showing required by a line of Supreme Court decisions, *see Eastern Railroad Presidents Conference* v. *Noerr Motor Freight*, 365 U.S. 127 (1961); *United Mine Workers* v. *Pennington*, 381 U.S. 657 (1965); *California Motor Transport Co.* v. *Trucking Unlimited*, 404 U.S. 508 (1972); *Otter Tail Power Co.* v. *United States*, 410 U.S. 366 (1973); *Vendo Co.* v. *Lektro-Vend Corp.*, 433 U.S. 623 (1977). . . . The majority opinion seems to suggest that a showing of sham proceedings under *Franchise Realty* is not required where the claimed antitrust injury flows from patent litigation, but it does not indicate the respects in which patent litigation somehow presents a greater threat to interests protected by the Sherman Act than other types of suits governed by *California Motor* and *Franchise Realty*. . . . If attempted enforcement of a patent known to be invalid is the special circumstance which justifies a special rule, the court's opinion states no reason to depart from the requirement that a plaintiff prove knowing, intentional fraudulent procurement as stated in *Walker Process*. To the extent that abuse of the judicial process by bad faith prosecution of a claim known to be without merit is the essence of the antitrust violation, the court's opinion states no reason for departing from the circuit's precedents, *see Franchise Realty*, governing this type of antitrust violation. Further, a more lenient rule for patent litigation appears at odds with the principal holding that a special burden of proof is required before an antitrust plaintiff may prevail on the claim of injury from a previous patent litigation, our purpose being to avoid undue discouragement to the adjudication of patent infringement claims." 601 F.2d at 998-99.

This decision of the Court of Appeals is the only one nationwide sustaining an antitrust claim based solely upon a single unsuccessful attempt to enforce a non-fraudulently procured patent.

REASONS FOR GRANTING THE WRIT

I. The Decision Below Conflicts With The Decisions Of Other Courts Of Appeals, Contradicts Applicable Constitutional Rulings Of This Court And Upsets The Balance Between The Patent And Antitrust Laws.

Handgards based its antitrust claim upon Ethicon's maintenance of a single unsuccessful action for the enforcement of a non-fraudulently procured patent. The Court of Appeals held that the maintenance of such an action "in what the jury found to be bad faith" was a sufficient predicate for antitrust liability. *See* 601 F.2d at 995. That decision is the only one in the federal system permitting an antitrust claim in such circumstances. Furthermore, in reaching that decision, the Court of Appeals disregarded this Court's decisions in *Virtue* v. *Creamery Package Manufacturing Co.*, 227 U.S. 8 (1913), and *Walker Process Equipment, Inc.* v. *Food Machinery & Chemical Corp., supra*, 382 U.S. 172. If allowed to stand, the decision below will strip patent holders of the protections from antitrust suits accorded them by prior decisions of this Court, and will have an *in terrorem* effect on enforcement of patents.

The rules governing the interplay of patent litigation and the antitrust laws have been articulated in two leading decisions of this Court: *Virtue* v. *Creamery Package Manufacturing Co., supra*, 227 U.S. 8, and *Walker Process Equipment, Inc.* v. *Food Machinery & Chemical., supra*, 382 U.S. 172. In *Virtue*, this Court held that an antitrust claim could not be based upon two

prior unsuccessful patent infringement actions, which were "prosecuted maliciously and without cause." 227 U.S. at 29. The Court refused to equate a claim for malicious prosecution of a patent, *i.e.*, prosecution in bad faith, with a claim for treble damages under the Sherman Act, noting that "the fact that [the defendant] failed in its suit [for infringement] against plaintiffs does not convict it of any [Sherman Act violation]." *Id.* at 38.

Walker Process Equipment, Inc. v. *Food Machinery & Chemical Corp., supra*, 382 U.S. 172, carved out a limited exception to the constitutional and statutory protection afforded patents. *Walker Process* held that a prior, unsuccessful patent infringement suit could form the basis for a subsequent antitrust action if, but only if, the antitrust plaintiff could prove that the patent had been obtained by "intentional fraud" on the Patent Office, and if the other elements of a Section 2 violation were proven. 382 U.S. at 176-77. In his famous concurring opinion, Justice Harlan clarified the rationale and the reach of *Walker Process:*

> To hold, as we do, that private suits may be instituted under § 4 of the Clayton Act to recover damages for Sherman Act monopolization knowingly practiced under the guise of a patent procured by deliberate fraud, cannot well be thought to impinge upon the policy of the patent laws to encourage inventions and their disclosure. Hence, as to this class of improper patent monopolies, antitrust remedies should be allowed room for full play. On the other hand, to hold, as we do not, that private antitrust suits might also reach monopolies practiced under patents that for one reason or another may turn out to be voidable under one or more of the numerous technicalities attending the issuance of a patent, might well chill the disclosure of inventions through the obtaining of a patent because of fear of the vexa-

> tions or punitive consequences of treble-damage suits. Hence, *this private antitrust remedy should not be deemed available to reach § 2 monopolies carried on under a non-fraudulently procured patent.* 382 U.S. at 180.

Read together, *Virtue* and *Walker Process* established a common-sense balance between potentially conflicting bodies of law: Absent intentional fraud in the procurement of a patent, an unsuccessful infringement action does not satisfy the elements of an antitrust claim, even if it is alleged that the infringement action had been "prosecuted maliciously and without cause," as in *Virtue.* Antitrust liability can be based only upon intentional fraud in the procurement of a patent, since any lesser standard of liability will "chill the disclosure of inventions . . . because of fear of the vexations or punitive consequences of treble-damage suits." 382 U.S. at 180 (Harlan, J., concurring).

The standard announced by the Court of Appeals in this case violates these established rules and fails to comport with the realities of patent litigation. The decision, if allowed to stand, permits a jury in the Ninth Circuit, as opposed to everywhere else in the federal system, to second-guess the propriety of virtually every decision made in a prior unsuccessful suit to enforce a patent. Patent litigation, however, is fraught with technical difficulties and ambiguities, engrafted upon the normal problems of fact arising in any lawsuit. As Judge Learned Hand noted, patent issues are as "fugitive, impalpable, wayward and vague a phantom as exist . . . in the whole paraphernalia of legal concepts. . . . If there be . . . issue[s] more troublesome, or more apt for litigation than this, we are not aware of it." *Harries* v. *Air King Products Co.*, 183 F.2d 158, 162 (2d Cir. 1950).

Thus, it is not a difficult task for the patent suit victor to dredge up uncertainties and to point to some circumstance surrounding the unsuccessful infringement

action that will permit the subsequent antitrust case to be placed before a jury for determination of the patentee's motives and knowledge. At the antitrust trial, the patentee may be further handcuffed, as was Ethicon below, by the doctrine of collateral estoppel. Applied with its full force, that doctrine can be used to preclude the patentee from proving that his adversary's case in the patent suit was not open and shut. The court below held that its decision would "provide reasonable protection for the honest patentee who brings an infringement action to protect his legal monopoly." 601 F.2d at 996. The vice inherent in this holding, however, is that a jury in a subsequent treble-damage action will be second-guessing decisions on extremely arcane patent law concepts in deciding whether the patentee was honest.*

The dilemma of the patentee is painful and obvious. Article I, Section 8, clause 8 of the United States Constitution, and the patent laws thereunder, give him the right to exclude others from using his invention for a limited period of seventeen years. In the event of infringement, however, he can exclude others only through an infringement action. If the decision in this case is allowed to stand, the maintenance of the infringement suit subjects the patentee to consequences far more grave than a determination that his patent is unenforceable. In the event his infringement suit is unsuccessful, his opponent will almost automatically have a *prima facie* case of an antitrust violation, thereby exposing the patentee to the risk of treble-damages.

Any patent holder would be deterred from enforcing a patent where the potential losses are so great. This in

---

* For example, as noted above, the trial court erroneously instructed the jury that it should determine whether Ethicon was guilty of bad faith in prosecuting the Gerard process patent if it found that Ethicon "knew that the invention was on sale more than one year prior to the filing of [Gerard's] application," even though there had never been any such sale or offer to sell.

turn "make[s] it too hazardous to ever seek a patent," *Bendix Corp.* v. *Balax, Inc.*, 471 F.2d 149, 155 n.9 (7th Cir. 1972), and "chill[s] the disclosure of inventions" in derogation of bedrock constitutional policy. *Walker Process Equipment, Inc.* v. *Food Machinery & Chemical Corp., supra,* 382 U.S. at 180 (Harlan, J., concurring).

This case is the first decision in the federal system eroding the protection to patentees required by *Walker Process* and *Virtue.* The lower federal courts, carefully adhering to this Court's decisions, have uniformly held that the maintenance of a single infringement action in bad faith is an insufficient predicate for a treble damage action: Absent proof of a multiplicity of bad faith suits,* and absent proof that the infringement action is part of an overall scheme to monopolize,** an unsuccessful infringement suit cannot be transformed into an antitrust violation unless the patent is fraudulently obtained. *See, e.g., Abbott Laboratories, Inc.* v. *Curtis Laboratories, Inc.*, 597 F.2d 1312 (9th Cir. 1979); *Kearney & Trecker Corp.* v. *Cincinnati Milacron, Inc.*, 562 F.2d 365 (6th Cir. 1977); *Norton Co.* v. *Carborundum Co.*, 530 F.2d 435 (1st Cir. 1976); *Agrashell, Inc.* v. *Hammons Product Co.*, 479 F.2d 269 (8th Cir.), *cert. denied,* 414 U.S. 1022 (1973); *Cataphote Corp,* v. *De Soto Chemical Coatings, Inc.*, 450 F.2d 769 (9th Cir. 1971), *cert. denied,* 408 U.S. 929 (1972). Only the Ninth Circuit in this case has held that a single "bad faith" prosecution of a patent states a claim under Section 2 of the Sherman Act. This decision directly conflicts with the decisions of other Courts of Appeals. Furthermore, the decision of the Court of

---

* *See, e.g., Otter Tail Power Co.* v. *United States,* 410 U.S. 366 (1973).

** *See, e.g., Kobe Inc.* v. *Dempsey Pump Co., supra,* 198 F.2d 416. As noted above the Court of Appeals held that this was "not a *Kobe* case," *i.e.*, not a case in which the patent infringement action was part of an overall scheme to monopolize. Both sides agree with this portion of the Court of Appeals' holding, and this issue is not raised for review in this Court.

Appeals runs squarely afoul of *Virtue* and *Walker Process,* applicable precedents of this Court which stand otherwise unquestioned both here and in the lower courts. Accordingly, this Court should grant review to reconcile the law on this important issue, and to determine whether its holdings in *Walker Process* and *Virtue* remain viable and dispositive here.

Finally, the decision below raises an important federal question which should be settled by this Court. Claims of bad faith prosecution are levelled far more easily than charges of fraudulent procurement.* Yet it is already unfortunately common for the defendant in an infringement action to raise the issue of fraudulent procurement. It has been estimated that charges of fraudulent procurement are raised in approximately half of all the patent suits filed each year. *See Kearney & Trecker Corp.* v. *Cincinnati Milacron, Inc.*, 403 F. Supp. 1040, 1046 (S.D. Ohio 1975), *aff'd,* 562 F.2d 365 (6th Cir. 1977).

Thus, the *Walker Process* rule has already changed the character of patent litigation by shifting significantly to the patentee the risks of patent litigation, and by giving great pause in the institution of infringement litigation. *See* Clark, *The Risks and Costs of Patent Litigation,* 1973 Utah L. Rev. 618, 623-26. Lowering the barriers still further, as the Ninth Circuit has done in this case, removes the last prophylaxis protecting the unsuccessful patent-holder, and leans intolerably toward the encouragement of baseless private antitrust suits with the *in terrorem* spectre of treble damages and attorneys fees.

---

* Handgards itself recognizes this fact in its Petition for Certiorari, at p. 11, where it states:

> Handgards did not undertake to prove fraud on the patent office. Indeed, it expressly abandoned any contention of such fraud. And, because it did not undertake to prove fraud as an integral part of its case (as did *Walker Process*) the evidentiary standard normally applicable to claims involving fraud is not applicable here and should not be. (emphasis in original)

II. The Decision Below Unfairly Strips Patent Enforcement Actions Of First Amendment Protection In Violation Of Applicable Decisions Of This Court.

In this case, the Court of Appeals upheld an antitrust claim based upon a single unsuccessful attempt to enforce a patent. In so holding, the Court of Appeals reached a novel conclusion concerning the proper scope of protection afforded to litigation under the First Amendment to the United States Constitution. This holding squarely disregards this Court's applicable decisions, and unfairly singles out patent holders for denial of their First Amendment rights of petition.

Commencing with *Eastern Railroad Presidents Conference* v. *Noerr Motor Freight Inc.*, 365 U.S. 127 (1961) and *United Mine Workers* v. *Pennington*, 381 U.S. 657 (1965),* this Court recognized that the First Amendment shields litigation from antitrust consequences except in the most limited circumstances. The right of petition, which includes the right of access to the courts,** is "protected by the Bill of Rights," and the Court has refused to "impute to Congress an intent [in the Sherman Act] to invade these freedoms." *Eastern Railroad Presidents Conference* v. *Noerr Motor Freight, Inc., supra*, 365 U.S. at 138. Accordingly, the institution and maintenance of litigation of any kind cannot expose the plaintiff to antitrust liability unless the litigation is a "mere sham." *Id.* at 144.

The parameters of this so-called "sham litigation exception" to the *Noerr-Pennington* doctrine of immunity have been established by this Court's decision in *Cali-*

* *See also California Motor Transport Co.* v. *Trucking Unlimited*, 404 U.S. 508 (1972); *Otter Tail Power Co.* v. *United States*, 410 U.S. 366 (1973); *Vendo Co.* v. *Lektro-Vend Corp.*, 433 U.S. 623 (1977).

** *See California Motor Transport Co.* v. *Trucking Unlimited, supra*, 404 U.S. at 510 (citing cases).

fornia Motor Transport Co. v. *Trucking Unlimited*, 404 U.S. 508 (1972), and by legions of decisions in the lower federal courts. Under this exception, litigation is divested of its antitrust immunity only if (1) the antitrust defendant has engaged in a pattern of baseless, repetitive lawsuits;* and (2) these lawsuits have the effect of barring the antitrust plaintiff from meaningful access to adjudictory tribunals.**

The Court of Appeals in this case disregarded these well-established guidelines. The decision below sanctions Handgards' claim even though it is based on but a single patent infringement action. No pattern of baseless, repetitive litigation was, or can be, shown. Furthermore, Handgard's cannot claim that Ethicon's infringement action barred it from meaningful access to adjudicatory tribunals, since Handgards was victorious in the infringement suit, and thereafter opened a second front in this antitrust action, suing Ethicon and its parent, selecting the forum, successfully opposing a motion to transfer the action, and, after a six-week trial, winning a $2 million

---

* The recent decision in *Vendo Corp.* v. *Lektro-Vend Corp.*, 433 U.S. 623 (1977), reaffirmed the requirement of a pattern of baseless, repetitive litigation. *See* 433 U.S. at 635 n.6 (Three-Justice plurality opinion); *id.* at 644 (Two-Justice concurring opinion).

** *See, e.g., California Motor Transport Co.* v. *Trucking Unlimited, supra*, 404 U.S. at 511-16; *Taylor Drug Stores, Inc.* v. *Associated Dry Goods Corp.*, 560 F.2d 211, 213 (6th Cir. 1977); *Franchise Realty Interstate Corp.* v. *San Francisco Local Joint Board of Culinary Workers*, 542 F.2d 1076 (9th Cir. 1976), *cert. denied*, 430 U.S. 940 (1977); *Metro Cable Co.* v. *CATV of Rockford, Inc.*, 516 F.2d 220, 225-26, 232 (7th Cir. 1975); *Rodgers* v. *FTC*, 492 F.2d 228 231 (9th Cir.), *cert. denied*, 419 U.S. 834 (1974); *Wilmorite, Inc.* v. *Eagan Real Estate Inc.*, 454 F. Supp. 1124 (N.D.N.Y. 1977), *aff'd mem.*, 578 F.2d 1372 (2d Cir.), *cert. denied*, 439 U.S 983 (1978); *Central Bank of Clayton* v. *Clayton Bank*, 424 F. Supp. 163, 165 (E.D. Mo. 1976), *aff'd mem.*, 553 F.2d 102 (8th Cir.), *cert. denied*, 433 U.S. 910 (1977); *Adolph Coors Co.* v. *A&S Wholesalers, Inc.*, 1975 Trade Cases ¶ 60,187 at 65,634 (D. Colo. 1975), *aff'd*, 561 F.2d 807 (10th Cir. 1977).

antitrust verdict. This is the antithesis of access-barring required to fit within the "sham litigation" exception.

Accordingly, this case presented neither of the classic elements of the "sham litigation" exception, and Ethicon's prior lawsuit is entitled to First Amendment immunity from antitrust liability. In refusing to accord Ethicon such immunity, the decision of the Court of Appeals disregards applicable decisions of this Court and denies Ethicon protection guaranteed it under the First Amendment.

Furthermore, the decision below, if allowed to stand, will adversely affect patent holders in their lawful attempts to exclude infringers from practising the invention disclosed in the patent. By refusing to accord First Amendment immunity to Ethicon's prior infringement action, the Court of Appeals in effect distinguished patent litigation from other litigation and held it entitled to less protection. Indeed, the Court of Appeals expressly acknowledged that its peculiar rule was "fashioned in response to the unique characteristics of proceedings in which the alleged violation of the antitrust law consists solely of one or more infringement actions in bad faith." *See* 601 F.2d at 996.

There is, however, nothing in precedent or reason to distinguish patent litigation from other litigation for the purpose of according it protection under the First Amendment. As Judge Kennedy noted, concurring in the result below, there is nothing to demonstrate that patent litigation is somehow more offensive to antitrust interests than other types of litigation. *See* 601 F.2d at 998-99. By derogating patent litigation in this regard, the Court of Appeals established an unsupportable distinction which strips patent holders of First Amendment protections. Such a distinction disregards the need to erect barriers to retaliatory suits against unsuccessful patent holders so as

to "avoid undue discouragement to the adjudication of patent claims." 601 F.2d at 999 (Kennedy, J., concurring). Unless reviewed by this Court, the decision below will unjustifiably isolate patent litigation as unworthy of the protection assured by the First Amendment and will unduly deter patent holders in their lawful attempts to enforce their constitutional and statutory right to exclude infringers.*

III. The Decision Below Denies Patent Holders The Constitutional Right Granted In Article I, § 8, Clause 8 Of The Constitution.

Article I, § 8, clause 8 of the United States Constitution gives "Inventors the *exclusive* right to their . . . discoveries." Congress has implemented this constitutional grant of exclusivity, *see* 35 U.S.C. § 154 (giving the patent holder "the right to *exclude* others from making, using or selling the invention throughout the United States . . ."), and this Court has recognized that "a valid patent excludes all except its owner from the use of the protected process or product." *United States* v. *Line Material Company*, 333 U.S. 287, 308 (1948). Thus, the possession of

---

* Since it found reversible error in the trial court's charge to the jury, the Court of Appeals found no need to reach the other issues urged by Ethicon, including the issue raised here, that Ethicon's prior infringement suit was immunized by the First Amendment. The Court noted that this and other issues "may be presented to the trial court on remand. . . ." 601 F.2d at 992, 995 n.16. The absence of an explicit ruling by the Court of Appeals on the issue raised here is no bar to a grant of certiorari. The issue was properly raised below in the briefs and on rehearing and should have been passed upon by the Court of Appeals since its resolution would dispose of the case. Moreover, the availability of a forum on remand is no substitute for direct review in this Court, where, as here, further proceedings would impinge upon rights protected under the First Amendment. *See Miami Herald Publishing Co.* v. *Tornillo*, 418 U.S. 241, 247 n.6 (1974) (citing cases).

a valid product patent permits the patent holder legally to exclude potential competitors. *See, e.g., United States* v. *E.I. du Pont DeNemours & Company*, 118 F. Supp. 41, 213-14 (D. Del. 1953), *aff'd*, 351 U.S. 377 (1956). Since it is only the *illegal* exclusion of competitors that gives rise to antitrust liability, a valid product patent is constitutionally protected from a charge of illegal monopolization of the market covered by the patent.

The decision below, however, effectively eradicates this constitutional protection for the following reasons. Concededly, practice of the Gerard process patent results solely in the production of heat sealed plastic gloves backed to paper. Handgards argued and the jury found that such gloves constituted the relevant market under § 2 in this case. The jury, however, found that Ethicon possessed a valid product patent (Orsini) covering that product, and hence, covering the relevant § 2 market. The district court entered a judgment of validity, *see* 1976-2 Trade Cases ¶ 61,138 at 70,140-41, from which Handgards took no appeal.

Thus, following the jury verdict the question inevitably arose whether Ethicon could be found guilty of monopolizing the market over which it had an indisputably valid product patent. The district court noted the "obvious appeal" of Ethicon's argument, *see* 1976-2 Trade Cases ¶ 61,138 at 70,142, but nevertheless rejected it. The Court of Appeals also recognized the problem inherent in Handgards' claim that Ethicon was guilty of illegally monopolizing a market over which it possessed a valid product patent monopoly, stating:

> "[T]he jury's finding in this case that Ethicon possessed a valid patent covering the market it was accused of monopolizing also raises doubts concerning whether plaintiff's lost profits 'flowed from' the antitrust wrong claimed in this case." 601 F.2d at 997.

These acknowledgements that the problem exists, however, do not solve the constitutional issue and reduce a constitutional protection afforded patents to a mere rule of damage recovery.

The avoidance of a ruling by the Court of Appeals on this issue is no bar to a grant of certiorari. The Court of Appeals should have passed on this issue, since it was properly raised and would have been dispositive. Moreover, the availability of a forum on remand is no solace here. To refuse to review this question now would therefore "result in completely unnecessary waste of time and energy in judicial systems already troubled by delays due to congested dockets." *Mills* v. *Alabama*, 384 U.S. 214, 217-18 (1966). Accordingly, review is proper at this time. *See generally Cox Broadcasting Corp.* v. *Cohn*, 420 U.S. 469, 479 (1975).

If permitted to stand, the decision below, in a variety of ways, effectively strips the patent holder of the right, given in the constitution and the patent laws, to exclude others from practicing the invention disclosed in the patent. It is at odds with the patent-anti-trust and First Amendment decisions of this court and all other federal courts. If followed, it will inevitably engender serious judicial confusion in these important areas.

CONCLUSION

For these reasons, a writ of certiorari should issue to review the judgment and opinion of the Court of Appeals for the Ninth Circuit.

Respectfully submitted,

APPENDIX

Opinion of the Court of Appeals

UNITED STATES COURT OF APPEALS

NINTH CIRCUIT

No. 76-3150

May 3, 1979

HANDGARDS, INC., a corporation,
Plaintiff-Appellee,

v.

ETHICON, INC., a corporation,
Defendant-Appellant,

As Modified on Denial of Rehearing and Rehearing En Banc July 27, 1979.

Robert M. Dunne, San Francisco, Cal., David F. Dobbins (argued), George S. Frazza, New York City, Dunne, Phelps & Mills, San Francisco, Cal., for defendant-appellant.

Maxwell M. Blecher (argued), Blecher, Collins & Hoecker, Joel R. Bennett, Kendrick, Netter, Orr & Bennett, Los Angeles, Cal., Morrison & Foerster, San Francisco, Cal., for plaintiff-appellee.

On Appeal from the United States District Court for the Northern District of California.

Before SNEED and KENNEDY, Circuit Judges, and VON DER HEYDT,* District Judge.

SNEED, Circuit Judge.

Ethicon appeals from a judgment rendered after a civil jury trial in which it was found guilty of violating

---

* Hon. James A. Von der Heydt, Chief United States District Judge for the District of Alaska, sitting by designation.

Section 2 of the Sherman Act by monopolizing or attempting to monopolize the market for heat-sealed plastic gloves sold to manufacturers of home hair care coloring kits. Plaintiff-appellee Handgards bases its private antitrust action upon its contention that Ethicon earlier had initiated and pursued a series of patent infringement suits against it in bad faith, or as an integral part of an overall scheme to monopolize. On appeal, Ethicon argues, *inter alia*, that the district court erred in instructing the jury that Ethicon could be found guilty of an antitrust violation upon proof by a mere preponderance of the evidence that it had prosecuted one or more ill-founded patent infringement actions in bad faith and with an intent to monopolize. This court has jursdcton pursuant to 28 U.S.C. § 1291. Because we conclude that the district court erred in so instructing the jury and because of certain deficiencies with respect to the court's charge regarding damages, we reverse the judgment entered below and remand the case for a new trial.

I.

Factual Background

It is helpful to set forth a brief description of the patent enforcement conduct which forms the basis for Handgards' antitrust complaint before reviewing the history of the instant action.

A. The Prior Patent Enforcement Conduct.

The plaintiff-appellee Handgards, Inc. is a Nebraska corporation engaged in the business of manufacturing, distributing, and selling disposable plastic gloves adhered to paper. Handgards was formed from the 1966 merger of two constituent disposable plastic glove manufacturers: Plasticsmith, Inc. (Plasticsmith) and Mercury Manufacturing Company (Mercury). The defend-

ant-appellant Ethicon, Inc. is a wholly-owned subsidiary of Johnson & Johnson and is engaged in the business of manufacturing, selling, and distributing surgical supplies. Prior to 1969, Ethicon manufactured, distributed, and sold disposable plastic gloves adhered to paper through its Arbrook division. Ethicon ended its participation in the disposable plastic glove business in 1969, when the assets of its Arbrook division were transferred to another Johnson & Johnson subsidiary named Arbrook, Inc.

In 1961 Ethicon acquired the assets of the Scott Company, which, for several years, had marketed disposable plastic gloves produced in accordance with a process developed by one of its founders, Joe Gerard. In so doing, Ethicon acquired both Gerard's pending application for a patent on his glovemaking process, as well as his glovemaking equipment.[1] In 1961 Ethicon also acquired the pending patent application of one Rene Orsini.[2] On April 3, 1962, the Gerard patent covering a glovemaking process issued to Ethicon. On October 20, 1964, the Orsini product patent covering a heat-sealed glove issued to Ethicon.

Both Plasticsmith and Mercury were engaged in the manufacture of heat-sealed disposable plastic gloves at the time the Gerard patent issued in 1962. After several months of unproductive negotiations concerning a licensing agreement for the Gerard patent between Ethicon and T. Hamil Reidy, the chief executive officer and controlling shareholder of Plasticsmith and Mercury, Ethicon filed patent infringement suits in October 1962

---

[1] Gerard filed the patent application covering his glovemaking process on January 2, 1958.

[2] Orsini filed an application for a French patent on September 17, 1956; he filed for a United States patent on September 17, 1957.

against both Plasticsmith and Mercury, alleging infringement of the Gerard patent.[3] In December 1964, after the Orsini patent issued, Ethicon supplemented its patent infringement complaints against Plasticsmith and Mercury by adding a claim that the Orsini patent also was being infringed.

In 1966 Plasticsmith and Mercury were merged into a successor corporation, Handgards, Inc., the plaintiff in this case. Reidy continued as the chief executive officer and controlling shareholder in Handgards. In 1967, after learning that some of the allegedly infringing machines operated by Handgards reportedly were owned by Reidy rather than by Handgards or either of its predecessor corporations, Ethicon filed an infringement action against Reidy individually at his Chicago, Illinois residence. Reidy thereafter voluntarily intervened in the consolidated action then pending in California.

The consolidated patent infringement suit was tried to the court in 1968. Ethicon's trial counsel dropped the claims concerning the Orsini patent from the action, reportedly because he thought Orsini to be the weaker of the two patents and because he believed that narrowing the issues before the court would enhance the chance of successfully prosecuting the Gerard patent. On April 25, 1968, the trial judge entered judgment for Handgards, concluding that the Gerard patent was invalid because of the existence of a "prior public use" of the process by

[3] Ethicon filed suit against Plasticsmith, a Delaware corporation, on October 30, 1962, in Delaware. Ethicon filed suit against Mercury, a Nebraska corporation, on October 31, 1962, in Nebraska. After attorneys for Plasticsmith prevailed on a motion to transfer the Delaware action to the Northern District of California, Ethicon's attorneys consented to the transfer and consolidation of the Mercury action with the Plasticsmith action.

Lyle Shabram, one of the founders of Plasticsmith.[4] On appeal, this court affirmed the district court in a brief per curiam decision.[5]

B. History of the Present Action.

Plaintiff-appellee Handgards filed this civil antitrust action in 1968 seeking to recover treble damages and other equitable relief for the injuries it claimed to its business and property by virtue of the alleged antitrust violations committed by defendant-appellant Ethicon and defendant Johnson & Johnson. The gist of plaintiff's complaint was that the parent-subsidiary defendants had either unilaterally or in concert, monopolized, attempted to monopolize, and conspired to monopolize trade and com-

[4] The "prior public use" defense arises under 35 U.S.C. § 102(b), which provides that:

> A person shall be entitled to a patent unless—
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States.

[5] *Ethicon, Inc.* v. *Handgards, Inc.*, 432 F.2d 438 (9th Cir. 1970), *cert. denied*, 402 U.S. 929, 91 S.Ct. 1525, 28 L.Ed.2d 863, *rehearing denied*, 403 U.S. 912, 91 S.Ct. 2204, 29 L.Ed.2d 690 (1971). The complete text of the court's decision reads as follows:

> Ethicon's Gerard patent No. 3,028,576 was held invalid because the trial court found that under 35 U.S.C. § 102(b) there was prior public use for more than one year of the concept of the machine, the subject of the patent.
>
> There is little or no direct contradiction in the oral evidence. In our view, we have a case that could have been decided either way. Ethicon contends the testimony of Handgards' principal was too weak and impaired by certain circumstances. But the trial court was entitled to give more weight to other circumstances which point to Handgards' version being correct.
>
> The decree is affirmed because the findings are not clearly erroneous.

merce for the purpose of eliminating plaintiff as a competitor in the sale of disposable plastic gloves to the hair care and medical markets.

Plaintiff altered its primary theory of recovery dramatically during the eight year period between the time it commenced this action and the time of trial in 1976. Handgards' suit began primarily as a *Walker Process* case, i.e., a suit alleging antitrust liability for the enforcement of a fraudulently obtained patent (Orsini).[6]

---

[6] *Walker Process* stands for the proposition that "the enforcement of a patent procured by fraud on the Patent Office may be violative of § 2 of the Sherman Act provided the other elements necessary to a § 2 case are present." 382 U.S. at 174, 86 S.Ct. at 349. Mr. Justice Harlan, concurring, stressed that "deliberate fraud" was required and that the Court did not hold

> that private antitrust suits might also reach monopolies practiced under patents that for one reason or another may turn out to be voidable under one or more of the numerous technicalities attending the issuance of a patent [for such a result] might well chill the disclosure of inventions through the obtaining of a patent because of fear of the vexations or punitive consequences of treble-damage suits.

382 U.S. at 180, 86 S.Ct. at 351-352 (Harlan, J., concurring).

Handgards' original complaint charged the defendants with (i) a violation of section 7 of the Clayton Act, allegedly occurring when Ethicon acquired the assets of the Scott Company in 1961 and (ii) violations of the Sherman Act, allegedly occurring as the result of a fraudulent procurement of the Orsini patent. A supplemental complaint was filed in 1974 which also charged that the defendants had continued to violate the antitrust laws since the date of the original complaint by committing certain illegal acts such as the instigation of baseless lawsuits and pricecutting. Neither complaint charged Ethicon with fraudulent procurement of the Gerard patent. Although plaintiff sought to add such a contention in 1974, the district court had denied leave to amend the complaint. The only allegations in either complaint pertaining to the invalidity of the Gerard patent were that the Gerard patent had been found invalid on the basis of a prior public use and that "[d]uring the pendency of such action, defendants obtained additional information showing and confirming the invalidity of the Gerard patent."

See Walker Process Equipment, Inc. v. *Food Machinery & Chemical Corp.*, 382 U.S. 172, 86S.Ct. 347, 15 L.Ed.2d 247 (1965). This theory ultimately proved not viable.[7] In 1975 Handgards expressly abandoned the *Walker Process* theory at a hearing on a motion for summary judgment and instead asserted the two theories on which this case ultimately was tried: the first was referred to at trial as the "overall scheme" theory; the second was referred to as the "bad faith" theory. The district court's published opinion on the motion for summary judgment reflected the new orientation of plaintiff's case. *Handgards, Inc.* v. *Johnson & Johnson*, 413 F. Supp. 921 (N.D. Cal. 1975).

> Handgards now largely bases its monopolization charge on the various patent infringement and other lawsuits brought on behalf of Ethicon by J & J house patent counsel. The claim is rooted

---

[7] In 1971 Ethicon filed a motion for summary judgment, arguing that the undisputed facts precluded a finding that the Orsini product patent had been fraudulently procured under the criteria set out in *Walker Process, supra. See* note 6 *supra.* The district court denied defendant's motion in 1972 pending completion of discovery in the case, but noted that "[a] ruling that no triable issue of fraud in the procurement of the Orsini divisional patent exists would be within . . . [its] sound discretion." Ethicon renewed its motion for summary judgment in 1975, at which time the district court granted the motion in part and denied it in part. *Handgards, Inc.* v. *Johnson & Johnson*, 413 F. Supp. 921 (N.D. Cal. 1975). The district court's opinion on the motion for summary judgment noted the death of any *Walker Process* allegations, stating that "Handgards represented at oral argument on the motion and in its post-hearing reply memorandum that it was not proceeding as though this case were governed by *Walker Process Equipment, Inc.* v. *Food Machinery & Chemical Corp.*" that the "abandonment by plaintiff of its primary theory of recovery based on the Orsini patent is no surprise," that the "Orsini patent infringement suit was not prosecuted in violation of *Walker Process,*" and that plaintiff's complaint had never contained a *Walker Process* allegation regarding the Gerard patent. 413 F.Supp. at 923.

in *Kobe, Inc.* v. *Dempsey Pump Co.*, 198 F.2d 416 (10th Cir. 1952), *cert. denied*, 344 U.S. 837, 73 S.Ct. 46, 97 L.Ed. 651 (1952), and its progeny—particularly *Mach-Tronics, Incorporated* v. *Zirpoli*, 316 F.2d 820 (9th Cir. 1963), *Rex Chainbelt, Inc.* v. *Harco Products, Inc.*, 512 F.2d 993 (9th Cir. 1975), and *Prelin Industries, Inc.* v. *G & G, Inc.*, 357 F. Supp. 52 (W.D. Okl. 1972). The Ethicon suits were purportedly brought as integral ingredients of a scheme to monopolize the disposable glove market. . . .

. . . . .

Plaintiff ffcharges that defendants attempted to create a monopoly in the disposable glove industry by accumulating a number of the relevant patents—no matter how weak or narrow—and then instigating a series of lawsuits in order to slowly litigate the competition out of business.

. . . . .

The bringing of a series of ill-founded patent infringement actions, in bad faith, can constitute an antitrust violation in and of itself *if* such suits are initiated or pursued with an intent to monopolize a particular industry (and, of course, the other elements of a Section 2 violation are present). *Otter Tail Power Co.* v. *United States*, 410 U.S. 366, 93 S.Ct. 1022, 35 L.Ed.2d 359 (1973); *California Motor Transport Co.* v. *Trucking Unlimited*, 404 U.S. 508, 92 S.Ct. 609, 30 L.Ed.2d 642 (1972); *Kellogg Co.* v. *National Biscuit Co.*, 71 F.2d 662, 666 (2d Cir. 1934); *Bolt Associates, Inc.* v. *Rix Industries, supra*, [1973—1 Trade Cases, ¶ 74,474 (N.D. Cal. 1973)].

413 F. Supp. at 923-25 (emphasis in original).

The court defined the term "bad faith" in this context as knowing that the particular patent was invalid because (i) Ethicon allegedly knew (through its agent Gerard) of relevant prior art existing more than a year before the filing of the Gerard patent application; (ii) Ethicon allegedly knew (through its agent Gerard) that the invention had been on sale more than a year prior to the filing of the Gerard patent application; or (iii) Ethicon allegedly knew that the Orsini patent was invalid because material information had been withheld from the patent examiner.[8] *Id.* at 925.

At the trial the parties presented dramatically different versions of the facts to the jury. Plaintiff contended that Ethicon had accumulated the Orsini and Gerard patents, two key patents in the field, intending to monopolize the industry; that Ethicon had initiated and pursued its patent infringement suits against Handgards and its predecessors in bad faith, i.e., with knowledge that the patents were invalid, for the purpose of monopolizing the market;[9] that even if brought in good faith, Ethicon's

---

[8] In its 1972 decision on defendant's motion for summary judgment, *see* note 7 *supra*, the district court noted that the failure to supply the Patent Office with information pertaining to the Orsini patent, which already allegedly was part of its files, did not constitute fraud on the Patent Office in the *Walker Process* sense. In its 1975 decision on defendant's motion for summary judgment, the district court formally held that Ethicon's "failure to inform the Patent Office of information in its own files does not amount to the extremely circumscribed 'intentional fraud' necessary to prove an action under *Walker Process*." 413 F.Supp. at 923.

[9] Plaintiffs argued that the Gerard and Orsini patents were known by Ethicon to be invalid because they claimed: (1) a Mr. Babb had testified that Gerard had told him that he knew the Gerard patent was invalid; (2) evidence had been introduced suggesting that Ethicon knew of Shabram's invalidating prior

[Footnote continued on following page]

infringement suits constituted individual predatory acts in an overall scheme to monopolize; and that Ethicon had generated adverse publicity regarding its infringement actions, threatening potential customers of the plaintiff, with the result that vital corporate resources were committed to defense of the infringement actions, Handgards' relations with potential customers were impaired, a proposed joint venture was aborted, and the company found itself unable to obtain outside financing necessary for it to remain competitive in the industry. Defendant Ethicon countered by arguing that it lacked any improper monopolistic motive in its acquisition of the Gerard and Orsini patents; that it had initiated the various infringement actions in complete good faith, after careful investigation, and with the reasonable expectation of success; that it did not publicize its infringement actions within the industry; and that Handgards' competitive problems resulted from its having marketed a lower quality product to respond to the competitive demands of the industry.

The jury returned a general verdict in favor of Handgards in the amount of $2,073,000 prior to trebling and gave the following responses to the special interrogatories submitted in the case: (1) the Orsini patent was not in-

---

public use; (3) evidence had been introduced suggesting (a) that Ethicon knew that Gerard's invention had been "on sale" more than one year prior to the date of the filing of the patent application within the meaning of 35 U.S.C. § 102(b) and (b) that Ethicon's patent attorneys knowingly falsified an answer to an interrogatory in the prior patent action regarding the "on sale" issue; (4) evidence had been introduced suggesting that Ethicon's patent attorneys knowingly falsified an answer to an interrogatory in the prior patent action concerning the date on which Gerard's invention had been reduced to practice, in an attempt to mislead Handgards' counsel into defending the suit on a more difficult ground; and (5) evidence had been introduced suggesting that Ethicon knew the Orsini patent to have been invalid because of its having been anticipated or made obvious by a prior patent.

valid on the basis of prior disclosures of another patent; (2) the relevant market in the case consisted of the market of heat-sealed plastic gloves sold to manufacturers of home hair care coloring kits; (3) Ethicon was guilty monopolizing or attempting to monopolize the relevant market by prosecuting the patent lawsuits against Handgards and its predecessors in bad faith, that is, with actual knowledge that either the Gerard or the Orsini patent was invalid; (4) Ethicon was guilty of monopolizing or attempting to monopolize the relevant market by prosecuting the prior patent action as a predatory act in an overall scheme designed to exclude Handgards from the market; and (5) & (6) Ethicon and Johnson & Johnson were not guilty of entering into an agreement, combination, or conspiracy to restrain trade or to monopolize the relevant market.

Ethicon advances six basic arguments on appeal: (1) the trial court erred in instructing the jury that the bad faith enforcement of a patent can, without more, constitute an exclusionary act for which antitrust liability may result; (2) the finding that Ethicon prosecuted its infringement actions in bad faith is based upon pure speculation; (3) the jury's finding that Ethicon possessed a valid patent (Orsini) which covered the market found to have been monopolized precludes entry of a verdict of illegal monopolization of that market; (4) the trial court erred in permitting the jury to determine the relevant market and instead should have found that the relevant market was broader than the one chosen by the jury; (5) Handgards failed to show any injury resulting from the alleged section 2 violations by Ethicon; and (6) the trial court erred in directing a verdict against Ethicon on its antitrust counterclaim against Handgards. Because we conclude that resolution of appellant's contentions concerning the bad faith theory and the damages recoverable in a case of this sort necessitate reversal and remand for a new trial, we need not, at this time, reach the other

issues urged by appellant. All such issues may be presented to the trial court for such reconsideration as it deems proper in the light of this opinion.

II.

Antitrust Liability for Patent Enforcement Conduct.

A. The Problem.

We are confronted in this case with the complex interaction between two conflicting bodies of law: One, the patent law, is concerned with the creation and commercial exploitation of a statutory grant of monopoly power; the other, the antitrust law, is concerned with proscribing various kinds of monopoly power.[10] Recon-

[10] The power to exclude, which is the essence of every patent, is monopoly power. Hence, "[a]ny action to enforce a patent is in a very explicit sense 'exclusionary,' both in purpose and, if successful, in effect." L. Sullivan, *Handbook of the Law of Antitrust* § 181, at 522 (1977). *See* P. Areeda & D. Turner, *III Antitrust Law* ¶ 704a, at 114-15 (1978). The patent laws contemplate "broad criteria of patentability while lodging in the federal courts final authority to [determine patent validity]," *Blonder-Tongue Laboratories, Inc.* v. *University Foundation*, 402 U.S. 313, 332, 91 S.Ct. 1434, 1444, 28 L.Ed.2d 788 (1971); patentees invoke that authority by initating infringement suits to enforce their patents. The antitrust laws on the other hand, proscribe certain types of exclusionary conduct that threaten or create monopoly power, including, in at least some situations, the use of vexatious litigation. *See, e.g., Otter Tail Power Co.* v. *United States*, 410 U.S. 366, 93 S.Ct. 1022, 35 L.Ed.2d 359, on *remand*, 360 F.Supp. 451 (D. Minn. 1973), *aff'd mem.*, 417 U.S. 901, 94 S.Ct. 2594, 41 L.Ed 2d 207 (1974). It therefore is necessary to reach an accommodation between the patent and the antitrust laws whenever antitrust liability is premised on a finding regarding a patenee's intent to monopolize or its exercise of exclusionary power. To determine the existence of section 2 liability properly requires careful distinctions between lawful patent-related exclusionary conduct or intent and unlawful patent-related exclusionary conduct or intent; only

[Footnote continued on following page]

ciling the interrelationship between the patent and antitrust laws has long been a topic of concern to courts as well as to commentators. *See, e.g., Walker Process Equipment, Inc.* v. *Food Machinery & Chemical Corp.*, 382 U.S. 172, 86 S.Ct. 347, 15 L.Ed.2d 247 (1965); *Rex Chainbelt, Inc.* v. *Harco Products, Inc.*, 512 F.2d 993 (9th Cir.), *cert. denied*, 423 U.S. 831, 96 S.Ct. 52, 46 L.Ed.2d 49 (1975); *Kobe, Inc.* v. *Dempsey Pump Co.*, 198 F.2d 416 (10th Cir.), *cert. denied*, 344 U.S. 837, 73 S.Ct. 46, 97 I.Ed.2d 651 (1952); P. Areeda & D. Turner, *III Antitrust Law* ¶ 704a, at 114-15 (1978); L. Sullivan, *Handbook of the Law of Antitrust* § 181 (1977); and Stedman, *Patents and Antitrust—The Impact of Varying Legal Doctrines*, 1973 Utah L.Rev. 588. This case presents yet another instance in which the boundaries of the patent-antitrust interface must be determined.

Patentees must be permitted to test the validity of their patents in court through actions against alleged infringers. Their status as alleged possessors of a legal monopoly does not cause them to be pariahs before the law. *Eastern Railroad Presidents Conference* v. *Noerr Motor Freight*, 365 U.S. 127, 81 S.Ct. 523, 5 L.Ed. 2d 464 (1961) and *United Mine Workers* v. *Pennington*, 381 U.S. 657, 85 S.Ct. 1585, 14 L.Ed.2d 626 (1965) re-

unlawful patent-related exclusionary conduct or intent is evidence of an intent to monopolize or the exercise of exclusionary conduct within the meaning attributed to section 2. *See SCM Corp.* v. *Xerox Corp.*, 463 F.Supp. 983 (D. Conn. 1978). The task then, is to "identify the point at which . . . [an attempt to enforce a patent], always exclusionary in . . . [the] literal sense, . . . become[s] so intractable as to warrant its being called exclusionary in the sense relevant to the establishment of a Section 2 violation. . ." L. Sullivan, *supra*, § 181, at 522.

quire no less.[11] On the other hand, infringement actions initiated and conducted in bad faith contribute nothing to the furtherance of the policies of either the patent law or the antitrust law.[12] The district court was correct in holding, in effect, that such actions may constitute an attempt to monopolize violative of Section 2 of the antitrust law.[13] "Bad faith," however, is a subjective state

---

[11] It is worth emphasizing that the absence of an immunity does not create an antitrust offense. The fact that defendant's conduct is not immune from antitrust scrutiny does not satisfy the plaintiff's burden of proving the usual element of an antitrust offense, including significant harm causally related to the conduct. P. Areeda & D. Turner, *supra, I Antitrust Law* ¶ 204e2.

See California Motor Transport Co. v. *Trucking Unlimited,* 404 U.S. 508, 92 S.Ct. 609, 30 L.Ed.2d 642 (1972); *Otter Tail Power Co.* v. *United States,* 410 U.S. 366, 93 S.Ct. 1022, 35 L.Ed. 22d 359, *on remand,* 360 F.Supp. 451 (D. Minn. 1973), *aff'd mem.,* 417 U.S. 901, 94 S.Ct. 2594, 41 L.Ed.2d 207 (1974); *Franchise Realty Interstate Corp.* v. *San Francisco Local Joint Executive Board of Culinary Workers,* 542 F.2d 1076 (9th Cir. 1976), *cert. denied,* 430 U.S. 940, 97 S.Ct. 1571, 51 L.Ed.2d 787 (1977).

[12] Subjecting a potential rival or actual rival to . . . [the burden of defending an infringement suit] may weaken him or even dissuade him from beginning or continuing the rivalry with the monopolist-patentee—and perhaps without regard to the merits of the infringement claim.

P. Areeda & D. Turner, *supra, III Antitrust Law* ¶ 708, at 145. *see generally* L. Sullivan, *supra,* § 181; Stedman, *supra,* at 593-94.

[13] An antitrust plaintiff pursuing a bad faith patent prosecution theory must still prove the other requisites of a § 2 offense. In *Walker Process* the Supreme Court emphasized the need to demonstrate the patentee's possession of exclusionary power within the relevant market before antitrust liability would result.

> To establish monopolization or attempt to monopolize a part of trade or commerce under § 2 of the Sherman Act [on a *Walker Process theory*], it would . . . be necessary to appraise the exclusionary power of the illegal patent claim in terms of the relevant market for the product involved. Without a definition of that market there is no way to measure . . . [defendant's] ability to lessen or destroy competition. It may be that the [patented] device

[Footnote continued on following page]

of mind the existence of which, while not susceptible to certain proof, easily can spring from suggestive and weakly corroborative circumstances.

The problem, as we see it, is to provide the means whereby the bad faith infringement action can be identified post hoc with a sufficiently high degree of certainty to make it highly improbable that the action in fact was brought in good faith. The imposition of treble damages, a sanction strongly punitive, *see Walker Process, supra,* 382 U.S. at 180, 86 S.Ct. 347 (Harlan, J., concurring) and P. Areeda & D. Turner, *supra, II Antitrust Law* ¶¶ 311, 331, dictates that such means exist. For reasons which appear below the solution of this problem points the way to the proper disposition of this case.

> . . . does not comprise a relevant market. There may be effective substitutes for the device which do not infringe the patent. This is a matter of proof, as is the amount of damages . . .

382 U.S. at 177-78, 86 S.Ct. at 350-51.

We note the existence of a jury finding in this case that the relevant market consisted of the market of heat-sealed plastic gloves sold to manufacturers of home hair care coloring kits, or the home hair care plastic disposable glove market; a market coterminous with that covered by the Gerard patent. In view of that finding, Ethicon's prosecution of a bad faith infringement action likely would constitute an attempt to monopolize violative of section 2. The requisite intent to monopolize in this case could be inferred from the finding of bad faith. Not all bad faith infringement actions will necessarily constitute attempts to monopolize violative of section 2. Nor will a patentee found guilty of prosecuting an infringement action in bad faith necessarily be guilty of an offense of monopolization. The imposition of antitrust liability will depend upon plaintiff's proof that the defendant-patentee possessed or threatened to possess an ability to lessen competition in the relevant market.

B. The Solution.

Our search for a solution commences by distinguishing the facts of this case from those of the cases on which appellee Handgards primarily relies. First, this is not a *Walker Process* case. *Walker Process* stands for the proposition that "the enforcement of a patent procured by fraud on the Patent Office" may give rise to antitrust liability. *See* notes 6 & 7 *supra*. Plaintiff Handgards does not contend that Ethicon sought to enforce a fraudulently-procured patent. Instead, Handgards asserts that Ethicon prosecuted infringement actions in bad faith, that is, with knowledge that the patents, though lawfully-obtained, were invalid.

Second, this is not a *Kobe* case. *Kobe, Inc.* v. *Dempsey Pump Co.*, 198 F.2d 416 (10th Cir.), *cert. denied*, 344 U.S. 837, 73 S.Ct. 46, 97 L.Ed.2d 651 (1952). In *Kobe* a patentee had engaged in a plan of monopolization by acquiring all present and future patents relevant to an industry, obtaining covenants not to compete from those from whom it purchased the patents, publicizing its infringement suits throughout the industry, and threatening suit against anyone trading with the alleged infringer. *Kobe* and its progeny, among which is *Rex Chainbelt, supra*, hold that a patentee may incur antitrust liability for even the good faith prosecution of a valid patent where it is shown that the infringement suit "was brought in furtherance and as an integral part of a plan to violate the antitrust laws." *Rex Chainbelt, supra*, 512 F.2d 1005-06.[14] Our careful examination of the record in this

[14] The issue in *Rex Chainbelt* was whether Harco could recover attorneys' fees incurred in its successful defense of a patent infringement suit as damages resulting from an antitrust violation by Rex Chainbelt. After studying the *Report of the Attorney General's National Committee to Study the Antitrust Laws*—247-48 (1955) and a line of cases highlighted by *Kobe, supra* and *Ansul Co.* v. *Uniroyal, Inc.*, 448 F.2d 872 (2d Cir. 1971), *cert.*

[Footnote continued on following page]

case reveals that no evidence of any overall scheme to monopolize exists *apart* from allegations that directly relate to the bad faith prosecution charges. The old wine in this case consists of evidence indicating that Ethicon may have brought the infringement actions in bad faith. It is the same old wine when put in a new bottle labelled "overall scheme." [15]

denied, 404 U.S. 1018, 92 S.Ct. 680, 30 L.Ed.2d 666 (1972), we concluded that "[t]he mere coincidence of an antitrust violation [an illegal tying arrangement] and a patent infringement suit is not sufficient to entitle Harco to attorney's fees expended in defense of the patent infringement claim absent some showing from which the . . . court can find or infer, that *the patent infringement suit was brought in furtherance and as an integral part of a plan to violate the antitrust laws.*" 512 F.2d at 1005-06 (emphasis added).

[15] The district court instructed the jury on both the "bad faith" and "overall scheme" theories, stating that "[the prosecution] of one or more ill-founded patent infringement actions in bad faith . . . constitutes an antitrust violation in and of itself if such suits are initiated or pursued with an intent to monopolize a particular market or industry," Reporter's Transcript at 2134, and that "if . . . the lawsuits instituted by Ethicon against plaintiff were brought or maintained in whole or in part to further a plan or a scheme . . . to monopolize . . . or in furtherance of a conspiracy or combination to monopolize or restrain trade . . . [then] the institution and maintenance of these suits violate the antitrust laws, even though the defendants may actually have believed that the . . . patents were valid, and even though the defendants believed that Handgards had infringed these patents." *Id.* at 2151. The court defined "bad faith" in this context as "knowing either at the time the lawsuit is filed or during its pendency that the particular patent sued upon is invalid." *Id.* at 2134. Proof of bad faith, the court charged, must be shown by a preponderance of the evidence, which it described as proof that the proposition is "more likely true than not true." *Id.* at 2095.

The district court summarized the evidence pertaining to the overall scheme for the jury as follows:

> . . . [U]nder the overall scheme theory, the plaintiffs contend that the defendants accumulated numerous patents

[Footnote continued on following page]

on plastic gloves to prevent competition; that they threatened to sue manufacturers, or purchasers, of allegedly infringing gloves, and misused the Gerard patent.

To support this claim, the plaintiff introduced Gerard's letter to Sam Porter, claiming that anyone manufacturing gloves on paper was in violation of his patent, and was subject to suit for patent infringement.

The plaintiff also presented the testimony of Mr. Webbe regarding the difficulty that Handgards encountered obtaining financing for its operations.

Mr. Campbell, a past employee of Glore Forgan, also testified that his company would not become involved in underwriting the sale of Handgards' stock, because of the pendency of the infringement suit.

Mr. Webbe also testified as to the reluctance of Sam Porter to enter into a joint venture because of the pending suit. And Porter, similarly, testified regarding his concern over the infringement action.

The defendants presented the following evidence to refute the plaintiff's claim that the patent suits were brought as part of an overall scheme to monopolize.

Messrs. Laff and Neuman both testified that the patent actions were filed against Plasticsmith and Mercury Manufacturing because Ethicon was unsure of the relationship between the two companies.

Mr. Laff explained that Delaware was chosen as the place to sue, because it was more convenient for Ethicon; and that after the court ordered the case transferred to San Francisco, Ethicon did not oppose the consolidation of the lawsuit against Mercury, so the action could be tried as one lawsuit.

Messrs. Laff and Neuman testified that the lawsuit was begun against Mr. Reidy when it was learned that Mr. Reidy paid for some of the accused machines.

The evidence shows Ethicon offered Handgards a license under the Gerard patent prior to the lawsuit.

Mr. Webbe and Mr. Blatz have testified that in their opinion the license offered was not reasonable, and would have put Handgards at a competitive disadvantage.

Messrs. Laff, Neuman, and Schlemmer, testified that the letter from Mr. Gerard to Mr. Porter, dated March 16th, 1965, in which Mr. Gerard enclosed a copy of his

[Footnote continued on following page]

Finally, this is not an *Otter Tail* case. *Otter Tail Power Co.* v. *United States*, 410 U.S. 366, 93 S.Ct. 1022, 35 L.Ed.2d 359, *on remand*, 360 F. Supp. 451 (D. Minn. 1973), *aff'd mem.*, 417 U.S. 901, 94 S.Ct. 2594, 41 L.Ed.2d 207 (1974). Handgards has neither pleaded nor proved that Ethicon engaged in a pattern of baseless, repetitive litigation designed to prevent meaningful access to an adjudicatory tribunal. *See generally Franchise*

patent, did not constitute a misuse of the Gerard patent.

The evidence shows that as of at least the date of that letter, all disposable plastic gloves purchased by hair care kit companies were manufactured under the Gerard process.

Mr. Gerard and Mr. Porter testified that the letter was sent at the specific request of Mr. Porter.

Messrs. Laff, Neuman, and Schlemmer testified that no one except a manufacturer of gloves could have been sued under the Gerard patent, which was the sole object of that letter.

Id. at 2114-16.

As we indicated in the text, our review of the record convinces us that only the bad faith theory of recovery exists in this case. The evidence of an overall scheme to monopolize the relevant market constitutes substantially the same evidence relied upon to show Ethicon's alleged bad faith prosecution conduct. If this evidence, under the instructions our opinion requires, should fail to support the bad faith theory, it should not be sufficient to support the overall scheme theory. To hold otherwise would undercut the protections we here seek to afford the ordinary patentee. For this reason we are unable to affirm the judgment below on the basis of the jury's finding that an overall scheme existed. It is unnecessary for us to address explicitly the issue whether the trial court erred in charging the jury on two theories. It is enough to point out that if on retrial the evidence remains substantially the same, the charge to the jury should reflect only the bad faith theory. We express no opinion on the type of additional evidence that would require an overall scheme charge. *Kobe, Inc.* v. *Dempsey Pump Co.*, 198 F.2d 416 (10th Cir.), *cert. denied*, 344 U.S. 837, 73 S.Ct. 46, 97 L.Ed.2d 651 (1952) is the archetype, however.

Realty Interstate Corp. v. *San Francisco Local Joint Executive Board of Culinary Workers*, 542 F.2d 1076, 1081 n.4, 1087 (9th Cir. 1976), *cert. denied*, 430 U.S. 940, 97 S.Ct. 1571, 51 L.Ed.2d 787 (1977).[16]

Rather, this case involves simply the commencement and maintenance of related infringement actions in what the jury found to be bad faith.

A clash between the policies of patent and antitrust laws also was present in *Walker Process* and *Kobe*. In the former the compromise consisted of erecting high barriers to success by the antitrust plaintiff. As we noted in *Cataphote Corp* v. *DeSoto Chemical Coatings, Inc.*, 450 F.2d 769 (9th Cir. 1971), *cert. denied*, 408 U.S. 929, 92 S.Ct. 2497, 33 L.Ed.2d 341 (1972):

> The patent fraud proscribed by *Walker* is extremely circumscribed. In *Walker* the Supreme Court excluded from its definition of fraud "an honest mistake as to the effect of prior installation upon patentability—so-called 'technical fraud.'" *Walker, supra,* [382 U.S.] at 177, 86 S.Ct. 347, 350 [15 L.Ed.2d 247]. Wholly inadvertent errors or honest mistakes which are caused by neither fraudulent intent or design, nor by the patentee's gross negligence, do not constitute fraud under *Walker*. . . . The road to the Patent Office is so tortuous and patent litigation is usually so complex, that "knowing and willful fraud" as the

[16] Judge Kennedy's opinion, concurring in the result and qualifiedly concurring in the majority's opinion, suggests that defendant Ethicon may have available on remand the "immunity" afforded by *Franchise Realty*. Our opinion treats "infringement actions initiated and conducted in bad faith," established in the manner we require, as violative of Section 2 of the antitrust law. When so established, it would be strange to then hold that nonetheless a *Franchise Realty* immunity might exist. In any event, this is an issue that the present record does not require us to address.

> term is used in *Walker* can mean no less than *clear, convincing proof of intentional fraud involving affirmative dishonesty*, "a deliberately planned and carefully executed scheme to defraud * * * the Patent Office." . . . Patent fraud cases prior to *Walker* required a rigorous standard of deceit. . . . *Walker* require no less.

450 F.2d at 772 (emphasis added) (footnote and citations omitted). *See SSP Agricultural Equipment, Inc.* v. *Orchard-Rite Ltd.*, 592 F.2d 1096 at 1103 (9th Cir. 1979).

In overall scheme cases such as *Kobe*, courts require proof of an overall scheme to monopolize independent of the mere commencement of an infringement suit before permitting the imposition of antitrust liability based on patent enforcement conduct. This requirement diminishes the specter of antitrust liability encountered by an ordinary patentee who brings an infringement action. *See* Hibner, *Litigation as an Overt Act—Development and Prognosis*, 46 Antitrust L.J. 718, 720 (1977).

The common thread is that in both *Walker Process* and *Kobe* barriers were erected to prevent frustration of patent law by the long reach of antitrust law. This suggests our proper course. It is to erect such barriers to antitrust suits as are necessary to provide reasonable protection for the honest patentee who brings an infringement action to protect his legal monopoly.

A proper barrier is, in our opinion, suggested by *Walker Process*. It is that the jury should be instructed that a patentee's infringement suit is presumptively in good faith and that this presumption can be rebutted only by clear and convincing evidence. *See Cataphote Corp., supra*, 450 F.2d at 772; *SSP Agricultural Equipment, supra*. Such an instruction accords the patentee a presumption commensurate with the statutory presumption of patent validity set forth in the patent laws, 35

U.S.C. § 282, which can only be rebutted by a showing of clear and convincing evidence. *See, e.g., Santa Fe-Pomery, Inc.* v. *P & Z Co.*, 569 F.2d 1084, 1091 (9th Cir. 1978); *Saf-Gard Products, Inc.* v. *Service Parts, Inc.*, 532 F.2d 1266, 1271 (9th Cir.), *cert. denied*, 429 U.S. 896, 97 S.Ct. 258, 50 L.Ed.2d 179 (1976).

The trial court in this case, however, gave no such instruction. *See* note 15 *supra.* Moreover, it charged that the patentee's subjective bad faith need only be proved by a mere preponderance of the evidence. This constitutes reversible error. The district court charge eliminates a barrier we hold necessary, and were it accepted as proper, "might well chill" legitimate patent enforcement efforts "because of fear of the vexations or punitive consequences of treble-damage suits." *Walker Process, supra*, 382 U.S. at 180, 86 S.Ct. at 352 (Harlan, J., concurring).

The barrier we impose is not one intended to be utilized in antitrust litigation generally. It is fashioned in response to the unique characteristics of proceedings in which the alleged violation of the antitrust law consists solely of one or more infringement actions initiated in bad faith.

III.

Damages Recoverable By Victims of Bad Faith Infringement Actons.

Difficulty also exists with respect to the trial court's charge to the jury concerning the nature of the injuries for which plaintiff properly may recover damages in an antitrust suit based upon a bad faith prosecution theory. "The Supreme Court has recently ruled that the only damages recoverable in an antitrust suit are those which occur by reason of that which made the defendant's actions unlawful." *Kapp* v. *National Foot-*

ball League, 586 F.2d 644, 648 (9th Cir. 1978) (citing *Brunswick Corp.* v. *Peublo Bowl-O-Mat, Inc.*, 429 U.S. 477, 489, 97 S.Ct. 690, 50 L.Ed.2d 701 (1977). *Brunswick* states the applicable rule and is the governing authority:

> . . . [For] plaintiffs to recover treble damages . . . they must prove more than injury causally linked to . . . [the antitrust violation]. Plaintiffs must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful. The inquiry should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be "the type of loss that the claimed violations . . . would be likely to cause." *Zenith Radio Corp.* v. *Hazeltine Research*, 395 U.S. [100] at 125 [89 S.Ct. 1562 at 1577, 23 L.Ed.2d 129].

429 U.S. at 489, 97 S.Ct. at 697-698 (emphasis in original) (footnote omitted).

Plaintiff must show that the injury for which it seeks to recover is "the type the antitrust laws were intended to prevent" and "flows from that which makes defendant's acts unlawful." In a suit alleging antitrust injury based upon a bad faith prosecution theory it is obvious that the costs incurred in defense of the prior patent infringement suit are an injury which "flows" from the antitrust wrong. Damages for the loss of profits, however, will not necessarily so flow. We have some doubt, for example, whether plaintiff's damage claim for lost profits allegedly resulting from the entry of an additional competitor into the market during the pendency of the infringement suit is the type of injury for which antitrust recovery is appropriate. "The anti-

trust laws . . . were enacted for 'the protection of *competition*, not *competitors*.'" *Brunswick, supra*, 429 U.S. at 488, 97 S.Ct. at 697 (quoting *Brown Shoe Co.* v. *United States*, 370 U.S. 294, 320, 82 S.Ct. 1502, 8 L.Ed. 2d 510 (1962). Moreover, the jury's finding in this case that Ethicon possessed a valid patent covering the market it was accused of monopolizing also raises doubts concerning whether plaintiff's lost profits "flowed from" the antitrust wrong claimed in this case.

The court's charge concerning the damages available to plaintiff for lost profits is ambiguous. Several times the court stated that plaintiff could only recover for lost profits that it would have earned "but for" the antitrust violation by the defendant. *See* Reporter's Transcript at 2160, 2162. The court also stated however, that plaintiff could recover as damages profits lost as the "proximate result" of the antitrust violation. *Id.* at 2163. The court earlier had defined the term "proximate cause" to mean "an act . . . [that] played a substantial part in bringing about" the injury. *Id.* at 2161. According to *Brunswick*, plaintiff must show more than that is suffered injury causally linked to the antitrust violation; the injury must be shown to have "flowed" from the wrong. To "flow" from the wrong, *Brunswick* suggests, the loss must be "'the type of loss that the claimed violations . . . would be likely to cause.'" 429 U.S. at 489, 97 S.Ct. at 697, quoting from *Zenith Radio Corp.* v. *Hazeltine Research*, 395 U.S. 100, 125, 89 S.Ct. 1562, 23 L.Ed.2d 129 (1969). To be one of several causes is not enough. The injury must be of the type likely to be caused by the defendant's bad faith infringement action. On the record before us we are left in doubt whether the *Brunswick* test has been met with respect to plaintiff's claim for lost profits. The failure of the trial court to resolve this doubt specifically constitutes error.

IV.

The Reasonable Balance.

The additional burdens imposed by our holdings on those who seek an antitrust recovery against one who has brought a patent infringement action against them achieve what we believe to be a reasonable accommodation of the policies of patent and antitrust law. Patent holders must be cautious in bringing infringement actions and alleged infringers remain equipped with a strong retaliatory weapon available for use against those who sue them in bad faith.[17] We think this represents a reasonable balance.

Accordingly, this case is reversed and remanded to the district court for a new trial in accordance with the views expressed herein.

REVERSED and REMANDED.

Each party to this appeal shall bear its own costs and neither party's costs shall be taxed against the other. Rule 39, F.R.App.P.

---

[17] We note that substantial disincentives to instigating ill-founded patent infringement suits that are not actionable under the standard of antitrust liability announced today already exist. For example, the patent laws contain a specific remedy for prosecution in bad faith. 35 U.S.C. § 285; the rule of collateral estoppel announced in *Blonder-Tongue Laboratories, Inc.* v. *University Foundation*, 402 U.S. 313, 91 S.Ct. 1434, 28 L.Ed.2d 788 (1972) serves to dissuade ill-founded patent infringement suits; and nothing appears to preclude a successful defendant in an infringement action from bringing a common law malicious prosecution claim. Moreover, this opinion does not limit any antitrust liability that a patentee may incur for conduct actionable under an overall scheme or *Walker Process* theory.

On Petition for Rehearing.

KENNEDY, Circuit Judge, concurring:

I concur in the result of Judge Sneed's opinion, and think it inappropriate to address the question whether or not Ethicon could rely on an immunity granted to antitrust defendants under the principles set forth in *Franchise Realty Interstate Corp.* v. *San Francisco Local Joint Executive Board of Culinary Workers*, 542 F.2d 1076 (9th Cir. 1976), *cert. denied*, 430 U.S. 940, 97 S.Ct. 1571, 51 L.Ed.2d 787 (1977). The matter was not raised by Ethicon at any stage of these proceedings. Since a new trial is required in this case, because of the erroneous jury instructions noted by the majority, the district court in the first instance should determine whether Ethicon may raise the question on retrial.

In *Franchise Realty* we held that an antitrust plaintiff must plead that the litigation or petitions which allegedly caused competitive injury were sham proceedings, the showing required by a line of Supreme Court decisions, *see Eastern Railroad Presidents Conference* v. *Noerr Motor Freight*, 365 U.S. 127, 81 S.Ct. 523, 5 L.Ed.2d 464 (1961); *United Mine Workers* v. *Pennington*, 381 U.S. 657, 85 S.Ct. 1585, 14 L.Ed.2d 626 (1965); *California Motor Transport Co.* v. *Trucking Unlimited*, 404 U.S. 508, 92 S.Ct. 609, 30 L.Ed.2d 642 (1972); *Otter Tail Power Co.* v. *United States*, 410 U.S. 366, 93 S.Ct. 1022, 35 L.Ed. 359 (1973); *Vendo Co.* v. *Lektro-Vend Corp.*, 433 U.S. 623, 97 S.Ct. 2881, 53 L.Ed.2d 1009 (1977). *Franchise Realty* might be interpreted to require dismissal of antitrust claims unless the plaintiff can show that the defendant's conduct was designed to cause competitive injury by exacting such extraordinary costs that meaningful use of an agency or tribunal was barred, *see* 542 F.2d at 1080-81 & n. 4, and perhaps to require further that the defendant must have engaged in conduct

other than instigation and maintenance of the proceedings, *see id. See also Wilmorite, Inc.* v. *Eagan Real Estate Inc.*, 454 F. Supp. 1124 (N.D.N.Y. 1977); *Ernest W. Hahn, Inc.* v. *Codding*, 423 F. Supp. 913 (N.D.Cal. 1976). Whether this is a correct interpretation of *Franchise Realty* or the Sherman Act, *cf.* P. Areeda & D. Turner, *Antitrust Law* § 201-204, 203c n.9 at 44-45 (1978), and whether Ethicon's conduct was actionable under such standards are important questions, but the issues are not presented for consideration here.

The majority opinion seems to suggest that a showing of sham proceedings under *Franchise Realty* is not required where the claimed antitrust injury flows from patent litigation, but it does not indicate the respects in which patent litigation somehow presents a greater threat to interests protected by the Sherman Act than other types of suits governed by *California Motor* and *Franchise Realty*. It is irrelevant that a successful plaintiff in a patent action is enforcing a lawful monopoly. Very costly "sham" unfair competition or tort suits, for example, may produce more anticompetitive injury than less costly but successful infringement actions. Moreover, it is difficult to argue that a successful plaintiff has engaged in sham litigation. But to the extent that the patent plaintiff is unsuccessful, I see little reason to distinguish patent litigation from other kinds of litigation. If attempted enforcement of a patent known to be invalid is the special circumstance which justifies a special rule, the court's opinion states no reason to depart from the requirement that a plaintiff prove knowing, intentional fraudulent procurement as stated in *Walker Process*. To the extent that abuse of the judicial process by bad faith prosecution of a claim known to be without merit is the essence of the antitrust violation, the court's opinion states no reason for departing from the circuit's precedents, *see Franchise Realty*, governing this type of antitrust violation. Further, a more lenient rule for patent

litigation appears at odds with the principal holding that a special burden of proof is required before an antitrust plaintiff may prevail on the claim of injury from a previous patent litigation, our purpose being to avoid undue discouragement to the adjudication of patent infringement claims. In my view, however, whether and why the kind of antitrust litigation permitted in *Walker Process* is distinguishable in meaningful ways from that discussed in *California Motor*, the relationship between the different standards applied in those cases, and the applicability of *Franchise Realty* to this case, are best left for a later decision when the point has been specifically raised by the parties.[1]

Finally, the majority states that in proving injury "flowing from" an antitrust violation, "To be one of several causes is not enough." To the extent this language suggests a change in the normal standards regarding causation in antitrust cases, the statements is unexplained. There is no need in this case to reexamine the rule that "proximate cause" in antitrust cases is defined in terms of "a substantial cause." *See Mulvey* v. *Samuel Goldwyn Productions*, 433 F.2d 1073 1075 n.3 (9th Cir.

---

[1] Defendant's position on this appeal was that antitrust claims based on the prior bringing of infringement actions differ from other kinds of antitrust suits based on alleged abuse of the judicial system. It expressly declined to rely on *Calfornia Motor*, stating in its brief: "The only relevance of *California Motor Transport*, which had nothing to do with patents, is its explicit reaffirmation by the Supreme Court of *Walker Process* as the applicable standard of fraud in connection with a § 2 case charging enforcement of invalid patents." Appellant's Brief at 27. Instead, defendants argued that this case was governed by *Walker Process*. They claim plaintiff should have been required to prove common law intentional fraud, not merely bad faith, and that the standard of proof should have been clear and convincing instead of a preponderance of the evidence. Their second argument is adopted in Judge Sneed's opinion.

1970); *Hecht* v. *Pro-Football, Inc.*, D.C. Cir., 187 U.S. App. D.C. 73, 570 F.2d 982, (1977); *Billy Baxter, Inc.* v. *Coca-Cola Co.*, 431 F.2d 183, 187 (2d Cir. 1970); E. Devitt & C. Blackmar, Federal Jury Practice and Instructions §§ 90.31, 80.18 (1977) ("proximate cause" in antitrust cases defined in terms of "substantial factor"). To the extent the language applies only to antitrust claims based on prior patent infringement actions, the majority similarly does not explain why a different causation rule is appropriate in this kind of case. *Brunswick Corp.* v. *Pueblo Bowl-O-Mat, Inc.*, 429 U.S. 477, 97 S.Ct. 690, 50 L.Ed.2d 701 (1977), is squarely in point for our holding that the injury must result from a competitive wrong prohibited by the antitrust laws, but in my view it should not be interpreted to introduce a new standard for proving causation either in antitrust cases generally or antitrust claims based on prior patent litigation. I am not as sure as Judge Sneed that part of Handgards' damages claim was for lost profits resulting from the entry of an additional competitor, but I agree that the effect of the Orsini patent on plaintiff's claim of injury creates an issue which the district court should decide.

With the above observations, I concur in the opinion of the majority.

IN THE

Supreme Court of the United States

October Term, 1979
No. 79-519

HANDGARDS, INC.,

Petitioner,

vs.

ETHICON, INC.,

Respondent.

Brief of Petitioner/Cross-Respondent Handgards, Inc., in Opposition to Cross-Petitioner's Petition for Writ of Certiorari.

I
Preliminary Statement.

Cross-petitioner, Ethicon, Inc. ("Ethicon"), presents three questions for this Court to decide. None of the three, independently or collectively, merit this Court's consideration at this time or on this record.

II
Reasons for Denying the Writ Sought by Ethicon.

A. Ethicon's Assertion That No Antitrust Violation Can Be Predicated on Knowingly Enforcing an Invalid Patent Is Insupportable.

Throughout this litigation, and even now, Ethicon has maintained that this Court's decision in *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp.*, 382 U.S. 172 (1965), and its earlier decision

in *Virtue v. Creamery Package Manufacturing Co.*, 227 U.S. 8 (1913), establish the position that (1) antitrust liability cannot be predicated on an attempt to enforce a patent with knowledge of its invalidity and (2) antitrust liability can be found *only* if the patent was originally procured by fraud.

This Court, although not presented with the issue squarely, has already twice suggested that this position is insupportable. First, in *Walker Process* the Court stated that its conclusion that a fraudulent procurement of a patent could lead to antitrust liability ". . . applies with equal force to an assignee who maintains and enforces the patent with knowledge of the patent's infirmity." 382 U.S. at 177 n.5. While this statement conceivably could be read as limited to assigned patents procured by fraud on the patent office, it makes absolutely no sense to do so because no public policy is served by distinguishing patentees who procure invalid patents from those who enforce them knowing of their invalidity. Indeed, no public policy is served by permitting any suit based on a patent which is *known* by the holder to be invalid regardless of the reasons for the invalidity. There is, therefore, not even the slightest suggestion in *Walker Process* that the Court intended to limit private antitrust actions in the patent field only to those cases where the patent was procured by fraud.

Second and more recently, Mr. Justice Stevens in the dissent in which three other Justices concurred in *Vendo Co. v. Lektro-Vend Corp.*, 97 S.Ct. 2881 (1977), observed: "Thus, the attempt to enforce a patent obtained by fraud, *or a patent known to be invalid for other reasons,* may constitute an independent violation of the Sherman Act. . . ." *Id.* at 2897.

(Stevens, J., dissenting) (footnotes omitted; emphasis added).[1] Neither the plurality, which decided the case on procedural grounds, nor the concurring opinion took any issue with this description of the substantive law.

In the real world, the anticompetitive effect of enforcing a patent procured by fraud and one *known* to be invalid for some other reason, *e.g.*, prior invention, prior sale, is precisely identical. Likewise, in the real world, the timing of a patent holder's discovery of the invalidity of his patent in itself has absolutely no bearing on the injury inflicted by an attempt to enforce it. Handgards, for example, was not any less injured because Ethicon discovered the invalidity of the Gerard patent after it had been accepted by the patent office than it would have been had invalidating circumstances been discovered and concealed while the patent was being prosecuted there. The critical fact, accepted by the jury, is that the invalidity was discovered and was known at the time of the attempt to enforce the patent. There is accordingly no logical, legal or economic basis for holding that private antitrust suits may be based upon attempts to enforce patents procured by fraud but not upon attempts to enforce patents *known* to be invalid for some other reasons.

The 1913 case of *Virtue v. Creamery Package Manufacturing Co., supra,* in no way contravenes this conclusion. The issue in that case was whether separate patent suits brought by different, non-related companies were "part of the more comprehensive plan and scheme to secure a monopoly in the United States of the business of making and selling creamery supplies. . . ."

---

[1]The Court cited *MacGregor v. Westinghouse Co.*, 329 U.S. 402 (1947), to support this conclusion.

(227 U.S. at 37), *i.e.*, whether two companies *conspired* to bring the suits as a part of a broader scheme of monopolization. A jury found in favor of defendants, and both the trial court and the court of appeals, reviewing the evidence, found no reason to set that determination aside. Neither did this Court, which emphasized that the issue of conspiracy was dispositive. "There was no liability asserted in the circuit court or in the circuit court of appeals against one of the defendants separately from the others. Concert and co-operation was asserted against all, and a ruling was not invoked as to the separate liability of either." *Id.* at 38.

The present case is quite different because here a ruling was invoked as to the separate liability of Ethicon and the jury upheld the claim of independent liability against Ethicon. For this reason alone, *Virtue* has no application here. Moreover, *Virtue* does not intimate, much less hold, that single firm conduct of the kind involved here is outside the scope of antitrust protection. And even if it did, such a view could not be squared with *Walker Process* which subsequently held that single firm conduct in enforcing a patent known to be invalid did indeed, given the other elements of a Sherman 2 violation, offend the antitrust laws.

We respectfully submit that Ethicon's hypertechnical distinction between one deliberate enforcer of an invalid patent and another is a specious one which does not merit this Court's attention.

B. The First Amendment Issues Are Spurious and, in Any Event, Are Not Ripe for Review at This Time on This Record.

Ethicon's contention that its enforcement of a patent which it knew was invalid was an activity protected by the First Amendment is, on its face, a bold attempt to clothe purposeful misuse of the judicial process with a cloak of constitutional dignity. The argument raised by Ethicon is almost self-refuting and, in any event, is not ripe for review.

Speaking for the majority of the panel below, Judge Sneed recognized both of these points:

> Our opinion treats "infringement actions initiated and conducted in bad faith," established in the manner we require, as violative of Section 2 of the antitrust law. When so established, it would be strange to then hold that nonetheless a *Franchise Realty* immunity might exist. *In any event, this is an issue that the present record does not require us to address.*

Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986, 995 n.16 (9th Cir. 1979) (emphasis added).

Even Judge Kennedy, who gratuitously advanced the possibility that the Ninth Circuit decision in *Franchise Realty Interstate Corp. v. San Francisco Local Joint Executive Board of Culinary Workers*, 542 F.2d 1076 (9th Cir. 1976), *cert. denied*, 430 U.S. 940 (1977), might afford immunity against this kind of antitrust suit, concluded with the observation that this determination was "best left for a later decision when the point has been specifically raised by the parties." 601 F.2d at 999 (Kennedy, J., concurring) (footnote omitted). In a footnote appended to that statement,

Judge Kennedy pointedly added that in its appeal to the Ninth Circuit, Ethicon "expressly declined to rely on *California Motor Transport* . . . ." *Id.* at 999 n.1.

The truth of the matter is that not until the Ninth Circuit issued its original opinion in which Judge Kennedy raised the First Amendment "immunity" question did Ethicon, at any stage below, present that question for resolution. In other words, the issue that Ethicon now contends is such a burning constitutional question is one which it either did not perceive or chose not to pursue (because of its obvious weakness) until after the Ninth Circuit made mention of it. Thus, this issue, which Ethicon now seeks to bring before this Court, is presented (a) without any prior decision by the lower courts upon briefing by the parties and (b) purely as a claim of inconsistency between decisions *within* a single circuit, a circuit which does not itself agree that such an inconsistency exists. Until both the district court and the Ninth Circuit Court of Appeals have had an opportunity to deal with the alleged immunity question and make appropriate determinations, we submit that it is not ripe for review by this Court.

Furthermore, *Franchise Realty* was a pleading case which addressed the degree of specificity required for asserting an antitrust claim based on sham proceedings, specifically prior proceedings before a local administrative agency. Even as a pleading case, *Franchise Realty* has not taken root outside the Ninth Circuit. In *MCI Communications Corp. v. American Telephone & Telegraph Co.*, 462 F.Supp. 1072, 1102 (N.D. Ill. 1978),[2]

[2]A subsequent order of the court on an unrelated matter was affirmed on appeal *sub nom. American Telephone & Telegraph Co. v. Grady*, 594 F.2d 594 (7th Cir.) (*per curiam*), *cert. denied*, 99 S.Ct. 1533 (1979).

Judge Grady directly disavowed the force of that decision: "Insofar as *Franchise Realty* imposes a greater burden of pleading particularly on a litigant alleging 'sham' activities than does Rule 8, we must respectfully disagree with the Ninth Circuit's conclusion and observe that at present this strict rule of pleading is not the law in this Circuit." *Id.*

Indeed, it now seems clear that *Franchise Realty* read this Court's decision in *California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508 (1972), far too narrowly to reach a proper accommodation between vexatious litigation as a means of violating the antitrust laws and the protections afforded by the First Amendment. Whatever doubt might have existed on that score has effectively been dispelled by at least those Justices who concurred with Mr. Justice Stevens' observations in *Vendo Co. v. Lektro-Vend Corp.* that "the attempt to enforce a patent known to be invalid for other reasons, may constitute an independent violation of the Sherman Act . . . ." 97 S.Ct. at 2897 (Stevens, J., dissenting) (footnotes omitted).

Ethicon's assertion that a competitor injured by bad faith litigation needs a multiplicity of suits before he can assert any antitrust claim is similarly misplaced. Such a requirement would eviscerate antitrust enforcement particularly in cases like this one where there was only one competitor and only one suit was needed to stifle ongoing competition altogether. And contrary to Ethicon's suggestion, this Court has never adopted such a harsh, limiting requirement. Indeed, while two Justices, concurring in the result in *Lektro-Vend*, have endorsed a multiple proceedings requirement, the plurality in *Lektro-Vend* did not reach the issue and the four dissenters vigorously disagreed, noting that:

Unlike the plurality which would draw a distinction between ongoing litigation and future litigation, *ante,* at 2889 n. 6, Mr. Justice BLACKMUN differentiates between a violation committed by a multiplicity of lawsuits and a violation involving only one lawsuit. The very case on which he relies rejects that distinction. In *California Motor Transport Co. v. Trucking Unlimited,* the Court stated:

> "Yet unethical conduct in the setting of the adjudicatory process often results in sanctions. Perjury of witnesses is one example. Use of a patent obtained by fraud to exclude a competitor from the market may involve a violation of the antitrust laws, as we held in *Walker Process Equipment v. Food Machinery & Chemical Corp.,* 382 U.S. 172, 175-177, 86 S.Ct. 347, 349-350, 15 L.Ed.2d 247. Conspiracy with a licensing authority to eliminate a competitor may also result in an antitrust transgression. *Continental Ore Co. v. Union Carbide & Carbon Corp.,* 370 U.S. 690, 707, 82 S.Ct. 1404, 1414, 8 L.Ed.2d 777; *Harman v. Valley National Bank,* 339 F.2d 564 (CA9 1964). Similarly, bribery of a public purchasing agent may constitute a violation of § 2(c) of the Clayton Act, as amended by the Robinson-Patman Act. *Rangen, Inc. v. Sterling Nelson & Sons,* 351 F.2d 851 (CA9 1965).
>
> There are many other forms of illegal and reprehensible practice which may corrupt the administrative or judicial processes and which may result in antitrust violations." 404 U.S. 508, at 512-513, 92 S.Ct. 609, 613, 30 L.Ed.2d 642.

Each of the examples given in this excerpt from the California Motor Transport opinion involves a single use of the adjudicatory process to violate the antitrust laws. Manifestly, when Mr. Justice Douglas wrote for the Court in that case and described "a pattern of baseless, repetitive claims," id., at 513, 92 S.Ct., at 613, as an illustration of an antitrust violation, he did not thereby circumscribe the category to that one example. Nothing in his opinion even remotely implies that there would be any less reason to enjoin the "[u]se of a patent obtained by fraud to exclude a competitor from the market," *id.,* at 512, 92 S.Ct., at 613, for example, than to enjoin the particular violation before the Court in that case.

Vendo Corp. v. Lektro-Vend Corp., supra, 97 S.Ct. at 2902 (Stevens, J., dissenting) (emphasis added).

Both because the First Amendment "immunity" does not extend to litigation purposefully brought in bad faith to interfere artificially with the competitive process and because Ethicon has failed to raise its immunity issues at any stage of this long litigation prior to its unsuccessful motion for rehearing before the Ninth Circuit, it is, we submit, inappropriate for this Court to consider those issues at this time.

C. In 1968, Ethicon Dropped Its Prosecution of the Orsini Patent Because It Was, According to Its Trial Counsel, a Far Weaker Patent Than the Gerard Patent. The Trial Judge Erroneously Required the Validity of the Orsini Patent to Be Litigated in the Antitrust Case on Narrow Grounds and the Jury's Determination of Its Validity Has No Legal Effect.

Ethicon claims that it is entitled to a monopoly based on the Orsini patent and that its invidious conduct to exclude Handgards through enforcement of the Gerard patent, which it knew to be invalid, is thus excused. During the patent case which preceded this antitrust action, Ethicon initially asserted claims of infringement based upon the Orsini patent. But in 1968, shortly after the trial of the patent case began, Ethicon withdrew the claims based on the Orsini patent and offered Handgards a covenant not to sue because, according to Ethicon's counsel, that patent was weak.

On the eve of trial of the antitrust case, the trial judge, because he believed it equitable, required that plaintiff prove the invalidity of the Orsini patent *to the* extent that plaintiff sought to show that the prosecution of the Orsini patent (until it was abandoned) was also in bad faith. We believe that requirement to have been erroneously imposed on Handgards. But in any event, the jury's determination that the Orsini patent was not invalid on the basis of the prior disclosures of another patent has no legal effect because the judgment below could have been supported solely on the basis of the bad faith prosecution of the Gerard

patent, which was the prosecution that in fact caused Handgards to be excluded from the market. The Orsini patent is, in short, a red herring because it was the wrongful Gerard suit which inflicted the damages suffered by Handgards. Consequently, for Ethicon to attempt to use the existence of the Orsini patent as a protective shield makes no more sense, and has no more merit, than for a price fixer to claim as a defense that increased material costs would have necessitated price increases just as high as his conspiracy. Indeed, when Ethicon presented the argument it now makes to this Court in support of its post-trial motions, Judge Orrick recognized that the determination regarding the Orsini patent was meaningless: "[I]n the Court's view, the finding of bad faith prosecution [of the Gerard patent] alone is sufficient to support the verdict." *Handgards, Inc. v. Johnson & Johnson,* [1976-2] Trade Reg. Rep. (CCH) ¶ 61,138 at 70,143.

III

Conclusion.

For all the reasons set forth herein, we respectfully submit that the cross-petition for certiorari should be denied. Further, should the Court deem any one of the questions raised by the cross-petition worthy of its attention, we respectfully submit that it should grant certiorari as to the questions raised in Handgards' petition as well, for only in that manner can the Court fairly determine whether the Ninth Circuit went too far, as Handgards asserts, or not far enough, as Ethicon

contends, in erecting barriers to antitrust claims founded in conscious misuse of patents and of the judicial process for enforcing them.

DATED: November 21, 1979.
